### Data in many forms. . .

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer printouts, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

### How to obtain more information

Inquiries about this publication and related statistics or services should be directed to the Statistics Canada reference centre in:

|            |          |                |          |
|------------|----------|----------------|----------|
| St. John's | 772-4073 | Sturgeon Falls | 753-4888 |
| Halifax    | 426-5331 | Winnipeg       | 949-4020 |
| Montréal   | 283-5725 | Regina         | 359-5405 |
| Ottawa     | 992-4734 | Edmonton       | 420-3027 |
| Toronto    | 966-6586 | Vancouver      | 666-3691 |

**Toll-free access** is provided in all provinces and territories, for users who reside outside the local dialling area of any of the regional reference centres:

|   |                      |
|---|----------------------|
| Newfoundland & Labrador                               | Zenith 07037         |

### How to order publications

This and other Statistics Canada publications may be purchased from local authorized agents and other community bookstores, through the local Statistics Canada offices, or by mail order to Publication Sales and Services, Statistics Canada, Ottawa, Ontario, K1A 0V7.

### Des données sous plusieurs formes. . .

Statistique Canada diffuse des données sous diverses formes. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms, et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiolingue et le système d'extraction de Statistique Canada.

### Comment obtenir d'autres renseignements

Toute demande de renseignements au sujet de cette publication ou de statistiques et services connexes doit être adressée aux centres de référence de Statistique Canada à:

|            |          |                |          |
|------------|----------|----------------|----------|
| St. John's | 772-4073 | Sturgeon Falls | 753-4888 |
| Halifax    | 426-5331 | Winnipeg       | 949-4020 |
| Montréal   | 283-5725 | Regina         | 359-5405 |
| Ottawa     | 992-4734 | Edmonton       | 420-3027 |
| Toronto    | 966-6586 | Vancouver      | 666-3691 |

Un **service d'appel sans frais** est offert, dans toutes les provinces et dans les territoires, aux **utilisateurs qui habitent à l'extérieur des zones de communication locale** des centres de référence régionaux:

|   |                      |

## INTRODUCTION

This bulletin contains 1981 Census data on population distribution by ethnic origin. Table 1 shows the population distribution by ethnic origin and sex, for Canada and provinces.

Table 2 provides a breakdown by selected ethnic origins and sex, for Canada and provinces, urban size groups, rural non-farm and rural farm.

Table 3 shows the population distribution by selected ethnic origins and sex, showing age groups, for Canada and provinces, urban and rural.

Table 4 shows the population distribution by selected ethnic origins, mother tongue and sex, showing official language and home language, for Canada and provinces. The number of persons whose mother tongue and home language are the same and the number for whom they differ can thus readily be calculated, permitting the linguistic stability and instability of certain ethnic groups to be determined.

Finally, Table 5 distributes the population by selected ethnic origins and sex, showing specific religions, for Canada, urban and rural.

The tables in this bulletin are based on sample data.

## DEFINITIONS

**Age.** Refers to age at last birthday (as of the census reference date, June 3, 1981). This variable is derived from date of birth.

**Ethnic Origin.** Refers to the ethnic or cultural group to which the respondent or the respondent's ancestors belonged on first coming to this continent.

It should be noted that in earlier censuses, only the respondent's paternal ancestry was to be reported, theoretically resulting in one ethnic origin per respondent. For 1981, this restriction has been removed and a person may now report more than one ethnic origin. The distinction between single and multiple responses is maintained in these data, but not all available multiple ethnic origins have been published.

## INTRODUCTION

Ce bulletin présente des statistiques tirées du recensement de 1981, sur la répartition de la population selon l'origine ethnique. Le tableau 1 indique la population selon l'origine ethnique et le sexe, pour le Canada et les provinces.

Au tableau 2 sont regroupées des données selon certaines origines ethniques et le sexe, pour le Canada et les provinces, régions urbaines par groupe de taille et régions rurales non agricoles et rurales agricoles.

La population selon certaines origines ethniques et le sexe, par groupe d'âge, pour le Canada et les provinces, régions urbaines et rurales, est présentée au tableau 3.

Le tableau 4 fournit des renseignements selon certaines origines ethniques, la langue maternelle et le sexe, par langue officielle et langue parlée à la maison, pour le Canada et les provinces. Il permet de connaître le nombre de personnes dont la langue maternelle est la même que la langue parlée à la maison et celui où ces deux langues sont différentes. Nous pouvons alors vérifier la stabilité et l'instabilité linguistique de certains groupes ethniques.

Finalement, le tableau 5 apporte des précisions sur la population selon certaines origines ethniques et le sexe, par certaines religions, au niveau du Canada, des régions urbaines et rurales.

Les tableaux de ce bulletin sont basés sur des données-échantillon.

## DÉFINITIONS

**Âge.** Âge au dernier anniversaire de naissance (à la date de référence du recensement, le 3 juin 1981). Cette variable est établie d'après la réponse à la question sur la date de naissance.

**Origine ethnique.** Groupe ethnique ou culturel auquel appartenait le recensé ou ses ancêtres à leur première arrivée sur ce continent.

Il convient de souligner que, dans les recensements précédents, les recensés devaient déclarer uniquement les antécédents ethniques ou culturels du côté paternel. Ainsi, une seule origine ethnique était indiquée pour chaque recensé. En 1981, cette précision a été supprimée; par conséquent, un recensé peut indiquer plus d'une origine ethnique. Les données sur les recensés qui ont plusieurs origines ethniques n'ont pas toutes été publiées.

**Home Language.** Refers to the specific language spoken at home by the respondent at the time of the census. If more than one language was spoken, the language spoken most often by the respondent was to be reported.

There is increased emphasis on the individual respondent in the wording of the 1981 question compared to that used in 1971. This was done to avoid the problem of respondents reporting the language used by the family or household as a whole, a response pattern which was present in the 1971 data. The intent of the question is the same for both census years. The term "Home language" replaces the 1971 expression "Language spoken most often at home".

**Mother Tongue.** Refers to the first language learned in childhood and still understood by an individual.

Although the intent of the question has not changed since 1941 (i.e., the identification of the language first learned as a young child), the wording of the question itself has not been completely uniform. The most recent of these changes is from the 1971/76 wording of "language first spoken and still understood" to the 1981 wording "language first learned and still understood". This change was introduced so the question would conform to the definition of mother tongue given in the Official Languages Act, 1968-69.

**Official Language.** Refers to the ability to conduct a conversation in either of the official languages of Canada.

It should be noted that persons who gave an official language as home language are considered to be able to conduct a conversation in this language. A processing procedure was implemented to ensure this consistency. In 1971 and earlier censuses, it was also assumed that a person who reported English or French as mother tongue could also speak or conduct a conversation in that language. Processing procedures ensured this consistency. A similar edit was not implemented for 1981.

**Religion.** Refers to specific religious groups or bodies, denominations, sects, cults or religious communities.

Respondents were instructed to report a specific denomination even if they were not necessarily active members of the denomination. For infants and young children, the religion to be reported was the one in which they were being brought up. In most cases, this would normally be the religion of their parent(s) or guardian(s). It should be emphasized that the census information on religion does not reflect actual membership, nor the degree of affiliation with, or commitment to, a given religious group. It should, therefore, be best interpreted in terms of stated identification with a specific religious group, body, sect, cult, community or individual belief system.

**Langue parlée à la maison.** Langue que le recensé parlait à la maison au moment du recensement. Si le recensé parlait plus d'une langue, il devait indiquer la langue qu'il utilisait le plus fréquemment.

Dans la question de 1981, contrairement à celle de 1971, on a choisi de mettre l'accent sur la langue du recensé afin d'éviter que ce dernier n'indique la langue parlée par l'ensemble des membres de la famille ou du ménage (comme ce fut le cas en 1971). Toutefois, cette question avait le même objet dans chacun des recensements. L'expression "Langue parlée à la maison" remplace "Langue d'usage" utilisée en 1971.

**Langue maternelle.** Première langue apprise et encore comprise.

Bien que l'objet de cette question n'ait pas changé depuis 1941 (c'est-à-dire connaître la première langue apprise par les recensés), la formulation n'a pas toujours été la même. En 1971 et 1976, on demandait aux recensés d'indiquer la première langue parlée et encore comprise tandis qu'en 1981, on leur demandait d'inscrire la première langue apprise et encore comprise. Cette modification a été apportée afin que la question du recensement corresponde à la définition de langue maternelle dans la Loi sur les langues officielles de 1968-1969.

**Langue officielle.** Permet de déterminer la capacité des recensés de tenir une conversation dans l'une ou l'autre des langues officielles du Canada.

Il est à noter que les personnes qui ont déclaré l'une ou l'autre des langues officielles comme langue parlée à la maison sont considérées comme étant en mesure de tenir une conversation dans cette langue. On a appliqué une méthode de traitement particulière pour assurer cette compatibilité. En 1971 et aux recensements précédents, on a supposé également qu'une personne qui déclarait l'anglais ou le français comme langue maternelle était capable de tenir une conversation dans cette langue. On avait également mis au point des méthodes de traitement pour assurer cette compatibilité. Un contrôle semblable n'a pas été appliqué en 1981.

**Religion.** Organisme, confession, secte, communauté ou culte religieux.

Les recensés devaient déclarer leur confession religieuse même s'ils n'étaient pas pratiquants. Dans le cas des enfants en bas âge, il fallait indiquer la religion dans laquelle ils étaient élevés (en général, il s'agit de la religion des parents ou des tuteurs). Il importe de souligner que les données du recensement ne permettent pas de connaître le nombre de fidèles ni de mesurer la pratique religieuse. Par conséquent, les données indiquent uniquement l'adhésion des recensés à une religion, une secte, un culte, une communauté ou à un système de croyances.

**Sex.** Refers to the gender of the respondent.

**Urban Population.** Refers to persons living in an area having a population concentration of 1,000 or more and a population density of 400 or more per square kilometre.

**Urban Population Size Group.** Refers to the classification used in tabulations where the urban areas are distributed according to the following size groups:

|          |          |
|----------|----------|
| 1,000-   | 2,499    |
| 2,500-   | 4,999    |
| 5,000-   | 9,999    |
| 10,000-  | 29,999   |
| 30,000-  | 99,999   |
| 100,000- | 499,999  |
| 500,000  | and over |

Urban areas are defined using population data from the previous census. It can therefore occur that an area meeting the criteria and defined as urban according to the population data of the 1976 Census will contain fewer than 1,000 people according to the 1981 Census. Where this occurs the population is assigned to the urban population size group 1,000 to 2,499.

**Rural Population.** Refers to persons living outside "Urban Areas".

**Rural Non-farm Population.** Refers to all persons living in rural areas and who are not members of the households of farm operators living on their farms for any length of time during the 12-month period prior to the census. Prior to the 1981 Census, rural non-farm population was defined as all persons living in rural areas in dwellings other than those situated on census farms.

**Rural Farm Population.** Refers to all persons living in rural areas who are members of the households of farm operators living on their farms for any length of time during the 12-month period prior to the census. Prior to the 1981 Census, rural farm population was defined as all persons living in rural areas in dwellings situated on census farms.

#### CONFIDENTIALITY AND RANDOM ROUNDING

The figures shown in this report have been subjected to a confidentiality procedure known as "random rounding" to prevent the possibility of associating small figures with any identifiable individual. Under this method, all figures including totals are randomly rounded (either up or down) to a multiple of "5". This technique provides strong protection against direct, residual or negative disclosures without adding significant error to the census data. However, since totals are independently rounded, they do not necessarily equal the sum of individual rounded figures in distributions. Also, minor differences can be

**Sexe.** Qualité d'homme ou de femme.

**Population urbaine.** Personnes demeurant dans une région qui a une concentration démographique de 1,000 habitants et plus, et une densité de population de 400 habitants ou plus au kilomètre carré.

**Groupe de taille de la population urbaine.** Classement utilisé dans les tableaux où la répartition des régions urbaines est indiquée selon les groupes de taille suivants:

|          |         |
|----------|---------|
| 1,000-   | 2,499   |
| 2,500-   | 4,999   |
| 5,000-   | 9,999   |
| 10,000-  | 29,999  |
| 30,000-  | 99,999  |
| 100,000- | 499,999 |
| 500,000  | et plus |

Les régions urbaines sont définies à partir des données démographiques du recensement précédent. Il peut arriver qu'un territoire répondant aux critères et défini comme urbain selon les données démographiques du recensement de 1976 contienne moins de 1,000 personnes selon les résultats du recensement de 1981. Dans ce cas la population de ce territoire fera partie du groupe de taille de la population urbaine 1,000 à 2,499.

**Population rurale.** Toutes les personnes vivant à l'extérieur des régions urbaines.

**Population rurale non agricole.** Toutes les personnes qui vivaient dans une région rurale mais n'étaient pas membres de ménages d'exploitants agricoles ayant résidé dans leur ferme pendant une période quelconque douze mois avant le recensement. Avant le recensement de 1981, la population rurale non agricole comprenait toutes les personnes vivant dans une région rurale et habitant un logement situé ailleurs que dans une ferme de recensement.

**Population rurale agricole.** Toutes les personnes demeurant dans des régions rurales, qui font partie de ménages d'exploitants agricoles ayant résidé dans leur ferme pendant une période quelconque douze mois avant le recensement. Avant le recensement de 1981, la population rurale agricole comprenait toutes les personnes vivant dans des logements situés dans des fermes de recensement dans des régions rurales.

#### CONFIDENTIALITÉ ET ARRONDISSEMENT ALÉATOIRE

Par souci de confidentialité, les chiffres publiés dans le présent rapport ont subi un arrondissement aléatoire qui supprime toute possibilité d'associer des chiffres à une personne facilement reconnaissable. Grâce à cette méthode, tous les chiffres, y compris les totaux, sont arrondis de façon aléatoire (vers le haut ou vers le bas) jusqu'à un multiple de "5". Cette technique assure une protection efficace contre la divulgation directe, négative ou par recoupements, sans ajouter d'erreur significative aux données. Cependant, comme les totaux sont arrondis séparément, ils ne correspondent pas nécessairement à la somme des chiffres arrondis dans les distributions. De plus, il faut s'attendre que les totaux

expected for corresponding totals and cell values in various census reports. Similarly, percentages, which are calculated on rounded figures, do not necessarily add to the total. Percentage distributions and rates for the most part are based on rounded data, while percentage changes and averages are based on unrounded data. Users are advised that each table is noted accordingly.

In addition to random rounding, for certain very small areas, to avoid publishing meaningless and potentially misleading data, and to absolutely avoid disclosure, a procedure referred to as "area suppression" has been adopted. Basically, the geographic area itself, as well as all data, is dropped completely from the tabulation in cases where there are fewer than 50 persons for self-enumeration areas and fewer than 25 persons for canvasser areas. Suppressed data are, however, included in the appropriate higher aggregate subtotals and totals. "Area suppression" is applied only to the sample data file, affecting the Profile Series B of bulletins and all of the User Summary Tape/Fiche program. In the case of income distributions, data are deleted if the total non-inmate population concerned is less than 250. This applies to the User Summary Tape/Fiche program, at the census tract and census subdivision levels, and within the Profile Series B.

The actual census tract (CT) or census subdivision (CSD) suppressed due to the rule described is indicated in the appendix to each Series B bulletin affected. Basic population counts, land area (and other data collected on a 100% basis) for these "missing" or suppressed entities can be obtained from the corresponding Profile Series A of bulletins, or tape and fiche program. (See Products and Services of the 1981 Census of Canada.)

Further, for certain subject-matter areas in the national and provincial bulletin series - income and industry/occupation - users will note the suppression of distributions where less than 250 persons or units are involved. In this case, the total area concerned is not suppressed, and as in "area suppression", such suppressed information is included in higher aggregates.

Further slight variations may exist in certain other circumstances, and more complete details on suppression will be contained in the Summary Guide - Sample Population (Catalogue No. 99-903).

et les autres chiffres correspondants dans divers bulletins du recensement présentent quelques légères différences. De même, la somme de pourcentages calculés à partir de chiffres arrondis ne correspond pas forcément au total des éléments. Les répartitions en pourcentage et les taux sont dans la plupart des cas basés sur des données arrondies, alors que les variations en pourcentage et les moyennes sont basées sur des données non arrondies. Les renvois au bas des tableaux avertissent l'utilisateur en conséquence.

Outre l'arrondissement aléatoire, pour éviter de présenter des renseignements inutiles et possiblement erronés et pour éliminer absolument toute divulgation, on a adopté, dans le cas de très petites régions particulières, une procédure connue sous le nom de "suppression des régions". Il s'agit essentiellement de supprimer complètement d'un tableau les régions géographiques elles-mêmes (et toutes les données) lorsqu'elles comptent moins de 50 habitants pour les secteurs d'autodénombrement ou moins de 25 habitants pour les secteurs de recensement par interview. Toutefois, les données supprimées sont incluses dans les totaux et totaux partiels à un niveau agrégé supérieur. Cette procédure s'applique seulement au fichier des données-échantillon, c'est-à-dire aux bulletins de la Série des profils B et au programme des bandes sommaires et des microfiches. Dans le cas des répartitions de revenus, les données sont supprimées lorsque le nombre total des pensionnaires hors institution visés est inférieur à 250. On applique également cette méthode au programme des bandes sommaires et des microfiches, au niveau des secteurs de recensement et des subdivisions de recensement ainsi que dans la Série des profils B.

Le secteur de recensement (SR) ou la subdivision de recensement (SDR) supprimés en raison de cette règle sont indiqués à l'annexe de chaque bulletin de la Série des profils B en question. Les principaux chiffres de population, les superficies (et les autres données recueillies sur une base de 100 %) pour ces entités manquantes ou supprimées sont présentés dans les bulletins correspondants de la Série des profils A ou sur les bandes et microfiches. (Voir Produits et services du recensement du Canada de 1981.)

En outre, pour certains sujets spécialisés (revenu, activité économique et profession) traités dans les bulletins de la Série nationale et de la Série provinciale, les utilisateurs noteront que les répartitions touchant moins de 250 personnes ou unités ne sont pas présentées. Dans un tel cas, la région complète n'a pas été éliminée, et comme pour la suppression de régions, les données manquantes figurent à un niveau agrégé supérieur.

Il est possible que d'autres variations minimales existent ailleurs auquel cas le Guide sommaire - Population-échantillon (n° 99-903 au catalogue) en donnera des renseignements plus détaillés.

## SAMPLING AND WEIGHTING

The 1981 Census data were collected either on a 100% basis (i.e. for all households) or on a sample basis (i.e. from only a random sample of households) with data weighted to provide estimates of the entire population. The information in this report was collected on a 20% sample basis and weighted up to compensate for sampling. All table headings are noted accordingly.

For any given geographic area, the weighted population, household, dwelling or families, total or subtotal may differ from that shown in reports containing data collected on a 100% basis. Such variation (in addition to the effect of random rounding) will be due to sampling.

## DATA QUALITY

### Introduction

Any census data will be subject to error. Some of the errors will tend to cancel out over a large number of cases (i.e. for larger cells) as errors will be made in both directions (i.e. random errors). In general the proportion or rate of net (i.e. uncanceled) random error increases as the population or cell size decreases. Thus small data values should be used with some caution.

Other of the errors will tend not to cancel out as they will have a tendency to occur in one direction more than another (systematic errors, for example, question wording which invites errors in one direction more than in the other) and will result in a bias.

The data contained in this bulletin are subject to coverage errors, response errors, processing errors and to sampling errors, in addition to any errors introduced by random rounding.

### Coverage Error

A coverage error occurs in the census whenever a person or a household is missed completely or counted more than once. Since overcoverage is expected to be fairly rare in relation to undercoverage, the net effect of such errors is to introduce a downward bias in census figures, so that the published census estimates tend to underestimate the actual population.

## ÉCHANTILLONNAGE ET PONDÉRATION

Les données du recensement de 1981 ont été recueillies sur une base de 100 % (c'est-à-dire auprès de tous les ménages) ou par un échantillonnage aléatoire des ménages; ces données sont pondérées afin de fournir des estimations sur l'ensemble de la population. Les renseignements figurant dans le présent bulletin ont été recueillis auprès d'un échantillon de 20 % et pondérés afin de compenser l'effet de l'échantillonnage. Tous les titres des tableaux ont été annotés en conséquence.

Quelle que soit la région géographique, le total ou total partiel pondéré de la population, des ménages, des logements ou des familles peut différer de celui qui figure dans les bulletins de données intégrales. Cet écart (autre l'effet de l'arrondissement aléatoire) sera attribuable à l'échantillonnage.

## QUALITÉ DES DONNÉES

### Introduction

Dans tout recensement, les données recueillies peuvent être entachées d'erreurs. Certaines de ces erreurs tendent à s'annuler à mesure que le nombre de cas observés augmente (c'est-à-dire dans le cas des classes plus importantes) puisque les erreurs se font dans les deux sens (erreurs aléatoires). De façon générale, la proportion ou le taux d'erreurs aléatoires nettes (c'est-à-dire qui ne se sont pas annulées) augmente au fur et à mesure que la taille de la population ou de la classe diminue. Aussi, faut-il utiliser avec une certaine réserve les petits chiffres obtenus.

Dans d'autres cas, les erreurs ne s'annulent pas parce qu'elles ont tendance à se produire dans un sens plutôt que dans un autre. Il s'agit d'erreurs systématiques. Par exemple, le libellé d'une question peut favoriser les erreurs dans un sens particulier. Ces erreurs entraînent un biais.

Des erreurs d'observation, des erreurs de réponse, des erreurs de traitement et des erreurs d'échantillonnage en plus des erreurs d'arrondissement aléatoire ont pu influencer sur la qualité des données fournies dans le présent bulletin.

### Erreur d'observation

Il y a erreur d'observation au recensement lorsqu'on oublie complètement une personne ou un ménage ou qu'on le (ou la) compte plus d'une fois. Étant donné qu'on s'attend à ce que le surdénombrement soit assez rare par rapport au sous-dénombrement, de telles erreurs produisent un biais vers le bas dans les statistiques du recensement, de sorte que les estimations publiées du recensement tendent à sous-estimer le chiffre réel de population.

A special study was undertaken in relation to the 1981 Census to measure the extent of the bias due to undercoverage. This study estimated the overall undercoverage rate to be of the order of 2% of the total population. It also indicated that undercoverage is higher in certain segments of the population, e.g., young male adults and recent immigrants. Similar trends were obtained in connection with the 1976 Census.

### Response Error

A response error occurs when the response recorded is incorrect. Such errors may occur due to the respondent misinterpreting the question, inadvertently checking the wrong box, or even consciously checking the wrong box. Contributing to this error may be the questionnaire wording or organization, or the training and attitude of enumerators.

### Processing Error

Processing errors can occur when write-in answers are coded, when responses on the questionnaire are transcribed to be read by the computer, and when imputations are done either for non-response or for edit rejects.

### Sampling Error

Data based upon responses collected on a sample basis and then weighted are subject to error due to the fact that the distribution of characteristics within the sample will not usually be identical to the distribution of characteristics within the population from which the sample has been selected.

The potential error that sampling has introduced will vary according to the relative scarcity of the characteristics in the population. For large cell values the potential error due to sampling, as a proportion of the cell value, will be relatively small. For small cell values this potential error, as a proportion of the cell value, will be relatively large.

The following table provides approximate measures of the error due to sampling. These measures are intended as a general guide only.

On a entrepris une étude spéciale sur le recensement de 1981 afin d'évaluer le biais entraîné par le sous-dénombrement. Selon les résultats, le taux global du sous-dénombrement serait de 2 % de l'ensemble de la population. L'étude a révélé que le sous-dénombrement est plus élevé dans certains groupes de la population, par exemple chez les jeunes adultes de sexe masculin et les nouveaux immigrants. On avait décelé les mêmes tendances lors du recensement de 1976.

### Erreur de réponse

Une erreur de réponse se produit lorsque la réponse enregistrée est incorrecte. De telles erreurs surviennent lorsque le répondant a mal interprété la question ou a coché la mauvaise case par inadvertance ou même volontairement. La formulation des questions ou le mode de présentation du questionnaire ainsi que la formation et l'attitude des agents recenseurs sont des facteurs qui peuvent favoriser ce genre d'erreurs.

### Erreur de traitement

Des erreurs de traitement peuvent se produire lorsque des réponses en toutes lettres sont codées, lorsque les réponses du questionnaire sont transcrites en langage d'ordinateur et lorsqu'on fait des imputations pour tenir compte soit de la non-réponse soit des rejets au contrôle.

### Erreur d'échantillonnage

Les données qui sont basées sur les réponses recueillies auprès d'un échantillon et qui sont ensuite pondérées sont sujettes à une erreur vu que la répartition des caractéristiques au sein de l'échantillon n'est habituellement pas identique à la répartition des caractéristiques au sein de la population à partir de laquelle l'échantillon a été prélevé.

L'erreur possible introduite par l'échantillonnage variera en fonction de la rareté relative de la caractéristique au sein de la population. Lorsqu'il y a des cases comportant des chiffres assez grands, l'erreur possible attribuable à l'échantillonnage, en proportion de la valeur de la case, sera relativement petite. Si les valeurs des cases sont petites, cette erreur, en proportion de la valeur de la case, sera toutefois relativement importante.

Le tableau suivant présente une évaluation approximée de l'erreur provenant de l'échantillonnage. Cette évaluation ne devrait servir que de guide.

**Table: Approximate Standard Error Due to Sampling for 1981 Census Sample Data**

**Tableau: Erreur type approximée provenant de l'échantillonnage des données-échantillon du recensement de 1981**

| Cell Value - Valeur des cases    |    |     |     |     |       |       |       |        |        |        |         |                                   |
|----------------------------------|----|-----|-----|-----|-------|-------|-------|--------|--------|--------|---------|-----------------------------------|
| Approximate<br>Standard<br>Error | 50 | 100 | 200 | 500 | 1,000 | 2,000 | 5,000 | 10,000 | 20,000 | 50,000 | 100,000 | 500,000                           |
|                                  | 15 | 20  | 30  | 45  | 65    | 90    | 140   | 200    | 280    | 435    | 600     | 1,300                             |
|                                  |    |     |     |     |       |       |       |        |        |        |         | Erreur<br>type<br>appro-<br>ximée |

Users wishing to determine the approximate error due to sampling for any given cell of data, based upon the 20% sample, should choose the standard error value in the column of the standard error table whose heading is closest to the value of the given cell in the census tabulation. When using the obtained standard error value, in general the user can be reasonably certain that, for the enumerated population, the true value (discounting all forms of error other than sampling) lies within plus or minus three times the standard error (e.g., for a cell value of 1,000 the range would be 1,000 + or - 3X65 or 1,000 + or - 195).

The standard errors given in the above table will not apply to population or universe (persons, households, dwellings or families) totals or sub-totals for the geographic area under consideration (see Sampling and Weighting above). The effect of sampling for these cells can be determined by comparison with a corresponding 100% bulletin.

The effect of the particular sample design and weighting procedure used in the 1981 Census will vary, however, from one characteristic to another and from one geographic area to another. The standard error values in the above table may, therefore, understate or overstate the error due to sampling. Factors which can be applied as an adjustment to these standard error values for each individual variable may be obtained by contacting the nearest Statistics Canada reference centre (see inside front cover).

These adjustment factors, additional information on the census methodology - in particular on sampling and weighting - and a more comprehensive assessment of the quality of the census data collected on a sample basis will be included in Data Quality - Sample Population (Catalogue No. 99-905).

## SPECIAL NOTES

### Inmates

Users should note that while some of the foregoing definitions of variables for which data were collected on a sample basis may specifically indicate the exclusion of "inmates", in actual fact, due to processing requirements, this is true of all population based tables in this report, even those involving cross-classification with data collected on a 100% basis (such as mother tongue). Moreover, the total population base for sample data, which can be referred to as the non-inmate population, will not exactly agree with the corresponding 100% figure, again due to a special processing requirement which lowered the final sample count by some 5,700 persons. Further details on this and any other processing changes affecting data comparability should be contained in Summary Guide - Sample Population (Catalogue No. 99-903) and Data Quality - Sample Population (Catalogue No. 99-905). (See also "Reference Products" section that follows).

Les utilisateurs qui désirent connaître l'erreur approximée provenant de l'échantillonnage pour une case de données en particulier, d'après l'échantillon 20 %, n'ont qu'à choisir la valeur de l'erreur type dans la colonne du tableau des erreurs types dont la rubrique est le plus près de la valeur de la case dans la totalisation du recensement. Lorsqu'il utilise la valeur obtenue de l'erreur type, l'utilisateur peut en général être raisonnablement certain que la valeur réelle de la population recensée (si l'on ne tient compte d'aucune forme d'erreur autre que l'échantillonnage) se situera à plus ou moins trois fois l'erreur type (par exemple pour une case dont la valeur est 1,000, l'écart s'étendra de 1,000 + ou - 3X65 ou 1,000 + ou - 195).

Les erreurs types données dans le tableau ci-dessus ne s'appliqueront pas aux totaux ou totaux partiels de la population ou de l'univers (personnes, ménages, logements ou familles) de la région géographique à l'étude (voir Échantillonnage et pondération ci-dessus). On peut connaître l'effet de l'échantillonnage sur ces cases en consultant le bulletin correspondant qui présente les données intégrales.

Les répercussions du plan d'échantillonnage et de la procédure de pondération utilisés au recensement de 1981 varieront, cependant, d'une caractéristique à une autre et d'une région géographique à l'autre. Les valeurs de l'erreur type dans le tableau ci-dessus pourront toutefois surestimer ou sous-estimer l'erreur provenant de l'échantillonnage. Pour obtenir les facteurs qui peuvent servir à rectifier les valeurs de l'erreur type de chaque variable, on peut s'adresser au centre de référence de Statistique Canada le plus proche (voir les renseignements au verso de la couverture avant).

Ces facteurs de rectification ainsi que des renseignements additionnels sur la méthodologie du recensement (plus particulièrement sur l'échantillonnage et la pondération) et une évaluation plus complète de la qualité des données du recensement recueillies auprès de l'échantillon paraîtront dans le bulletin Qualité des données - Population-échantillon (no 99-905 au catalogue).

## NOTES SPÉCIALES

### Pensionnaires d'institution

Bien que certaines des définitions précédentes des variables, pour lesquelles on a recueilli des données - échantillon, indiquent que les "pensionnaires d'institution" sont exclus, en fait, à cause des exigences du traitement, c'est le cas de tous les tableaux du présent bulletin basés sur la population, même de ceux qui affichent des classements recoupés avec des données intégrales (comme celles sur la langue maternelle). De plus, la base de la population totale pour les données - échantillon, que l'on peut désigner comme la population non pensionnaire, ne correspondra pas exactement au chiffre provenant des données intégrales, là encore en raison d'une exigence spéciale au traitement qui a fait baisser le chiffre définitif de quelque 5,700 personnes. Pour plus de détails sur la question ou sur tout autre changement de traitement touchant la comparabilité des données, voir Guide sommaire - Population-échantillon (no 99-903 au catalogue) et Qualité des données - Population-échantillon (no 99-905 au catalogue). (Voir également la section des "Produits de référence" qui suit.)

## Ethnic Origin

The 1981 ethnic origin question attempts to trace the "roots" of the population of Canada. The data derived from this question reflect respondents' perception of their ethnic background, and the cultural group with which they most closely identify.

The following factors should be noted in the analysis of the ethnic origin data.

- (1) Previous censuses usually traced ethnic origin through the paternal ancestry. (1) The 1981 Census is the first that does not restrict the tracing of ethnic origin to one side of the family.
- (2) The 1981 Census is the first to allow more than one ethnic origin response per individual (e.g., a response of French and German is valid and is retained for tabulation purposes). Previous censuses reduced all multiple ethnic origin responses down to a single response. For the 1971 Census, if more than one origin was indicated on the questionnaire, one was arbitrarily selected.
- (3) The multiple responses should ideally be used in conjunction with the single responses to give a complete picture on what answers were provided to the ethnic origin question. In addition, since the question is not specifically on race but acknowledges racial characteristics, the use of the ethnic origin responses to derive racial groupings may not be totally adequate. Forthcoming technical papers will address both these issues.
- (4) As 1971 Census processing reduced all multiple responses to a single response, it is not possible to compare 1971 data to 1981 for single responses. This comparison could underestimate the real change.

Similarly, a comparison of 1971 data to single plus multiple responses in 1981 could overestimate the real change.

- (5) In 1971, everyone who indicated their religion as Jewish was assigned a Jewish ethnic origin regardless of the origin reported. In 1981, although there was no such assignment, 94% of the non-inmate population with a single Jewish ethnic origin response also reported their religion as Jewish.

(1) In censuses from 1911 to 1931, the line of descent of people with Native or mixed Native/Non-native ancestry was traced through the mother's side.

## Origine ethnique

Au recensement de 1981, la question sur l'origine ethnique a été posée pour tenter de déterminer "les racines" de la population du Canada. Les données tirées des réponses à cette question indiquent la perception des répondants vis-à-vis leur origine ethnique et le groupe culturel auquel ils s'identifient le plus étroitement.

Il faut tenir compte des facteurs suivants en analysant les données sur l'origine ethnique.

- (1) Aux recensements antérieurs, l'origine ethnique était habituellement déterminée en fonction de l'ancêtre paternel(1). Le recensement de 1981 est le premier à ne pas avoir considéré seulement l'ascendance paternelle.
- (2) Le recensement de 1981 est le premier à accepter une réponse multiple sur l'origine ethnique des répondants (par exemple, une réponse "français" et "allemand" est valable et a été conservée aux fins des totalisations). Aux recensements antérieurs, on supprimait les réponses multiples à la question sur l'origine ethnique pour n'en garder qu'une. Au recensement de 1971, si le répondant avait indiqué plusieurs origines ethniques sur son questionnaire, on en choisissait une de façon arbitraire.
- (3) Idéalement, les réponses multiples devraient être utilisées avec les réponses uniques pour donner une image complète des réponses qui ont été fournies à la question sur l'origine ethnique. En outre, vu que la question ne porte pas spécifiquement sur la race mais qu'elle prend en compte les caractéristiques raciales, il ne serait peut-être pas tout à fait approprié de dériver des groupes raciaux à partir des réponses à la question sur l'origine ethnique. Ces deux questions seront d'ailleurs traitées dans des études techniques à venir.
- (4) Étant donné que toutes les réponses multiples données au recensement de 1971 ont été ramenées, lors du traitement, à une seule, il n'est pas possible de comparer les données uniques de ce recensement à celles de 1981, puisque cela pourrait entraîner une sous-estimation de la variation réelle.

De même, une comparaison des données de 1971 aux réponses uniques et multiples de 1981 pourrait entraîner une surestimation de la variation réelle.

- (5) En 1971, chaque répondant qui avait indiqué être de confession juive, peu importe l'origine ethnique qu'il avait déclarée, s'est vu attribuer l'origine ethnique juive. En 1981, bien que ces attributions n'aient pas eu lieu, 94 % de la population hors institution ayant indiqué être uniquement d'origine juive ont déclaré également appartenir à la religion juive.

(1) Aux recensements de 1911 à 1931, l'ascendance autochtone ou métisse des recensés a été établie sur le côté maternel.

- (6) It should also be noted that there are some apparent anomalies in 1981 data based on a misinterpretation of the ethnic origin question. This is evident when the ethnic origin variable is cross-classified with Place of Birth, Mother Tongue or Religion: by Place of Birth, some tables may include some Native Peoples born in India, Pakistan, Guyana, etc.; by Mother Tongue, some tables may include Native Peoples with Asian Indian mother tongue; and by religion some tables may include some Native Peoples with Eastern Non-Christian religions, notably Hindu, Islam and Sikh. These anomalies affect less than 1% of the data.

- (6) Il convient également de noter qu'il y a quelques anomalies apparentes dans les données de 1981 basées sur une interprétation faussée de la question sur l'origine ethnique. Ces anomalies apparaissent lorsqu'on recoupe la variable de l'origine ethnique avec le lieu de naissance, la langue maternelle ou la religion: selon le lieu de naissance, quelques tableaux peuvent inclure des autochtones nés en Inde, au Pakistan, en Guyane, etc.; selon la langue maternelle, quelques tableaux peuvent comprendre des autochtones parlant une langue maternelle indo-asiatique; et selon la religion, quelques tableaux peuvent comprendre des autochtones affichant des religions non chrétiennes orientales, en particulier hindoue, islamique et sikh. Ces anomalies touchent moins de 1% des données.

### Home Language

Edit and imputation specifications for Mother Tongue and Home Language reduce multiple responses to a single response. In 1981, multiple resolution involved a series of choices based on the frequency of languages reported within the family, whereas the 1971 resolution of multiples was essentially a more arbitrary and deterministic procedure.

When compared to Mother Tongue data, the Home Language data may provide an indication of the extent to which persons still use or no longer use the language they reported as Mother Tongue.

However, depending upon the action of the editing process, cases of identically reported multiple mother tongues and home languages, may result in a certain proportion where Mother Tongue differs from Home Language.

For example, if a respondent indicated a Mother Tongue of English and French, the edited Mother Tongue would be either response, but not both. Similarly, depending on the edit result, the respondent's Home Language may be designated as English or French.

In 1981, the edit and imputation procedure has indicated that there were some 22% of respondents identified with English Mother Tongue and French Home Language who reported an English and French Home Language. Similarly, 11% of the respondents shown with French Mother Tongue and English Home Language reported also a French Home Language. Similar occurrences characterized 1971, but exact proportions are not known.

Users should refer to the 1981 Census Dictionary for a basic description of the differences between 1971 and 1981.

### Langue parlée à la maison

Les procédures de contrôle et d'imputation pour la langue maternelle et la langue parlée à la maison réduisent les réponses multiples à des réponses uniques. En 1981, la résolution des réponses multiples est basée sur la fréquence des langues indiquées par les membres de la famille, alors qu'en 1971 elle est effectuée à partir des langues déclarées.

En comparant les données de la langue parlée à la maison à la langue maternelle, nous pouvons obtenir une indication des personnes utilisant ou n'utilisant pas la langue qu'elles ont indiqué comme langue maternelle.

Toutefois, à cause du processus de traitement, des personnes qui ont indiqué des réponses multiples identiques pour la langue maternelle et la langue parlée à la maison, peuvent se voir attribuer une langue parlée à la maison qui diffère de la langue maternelle.

Par exemple, si un répondant a indiqué une langue maternelle anglaise et française, la langue maternelle qui lui est attribuée est l'une ou l'autre, mais non les deux. Parallèlement, la langue anglaise ou française peut lui être assignée comme langue parlée à la maison.

En 1981, les procédures nous révèlent également qu'il y a 22 % des répondants identifiés avec l'anglais comme langue maternelle et le français comme langue parlée à la maison qui avaient indiqué initialement l'anglais et le français comme langue parlée à la maison. Également, 11 % des répondants avec une langue maternelle française et l'anglais comme langue parlée à la maison ont également indiqué le français comme langue parlée à la maison. La même situation s'est produite en 1971, mais les chiffres ne sont pas disponibles.

Les utilisateurs doivent se reporter au Dictionnaire du recensement de 1981 pour obtenir des indications sur les changements intervenus entre 1971 et 1981.

## Mother Tongue

Comparability of the 1981 and 1976 Census mother tongue data is affected by a number of factors:

- (a) There has been a decrease in the non-response rate from 1.9% in 1976 to 1.1% in 1981. As a result, an unknown portion of the change in any given mother tongue is due to a better enumeration of the population.
- (b) In the 1976 Census the 1.9% of the population who did not respond to the mother tongue question had their language coded as Not Stated. In the 1981 Census the 1.1% of the population who did not respond to the question were assigned a specific language (see table below).
- (c) Procedures for the removal of multiple responses, provided by 2.4% of the 1981 population, have changed for the 1981 Census. In 1976, an arbitrary and deterministic processing edit blanked the multiple responses, leaving only one valid response for each individual. In the 1981 Census, multiple languages were assigned a single response using probabilistic computer algorithms (see table below for the redistribution of combinations of English, French and Other).
- (d) The category "Indian, n.o.s." includes persons who are of aboriginal ancestry and those of Asian Indian ancestry. In 1976, these persons were all coded to "Native Indian" as mother tongue.

## Langue maternelle

Un certain nombre de facteurs influent sur la comparabilité des données des recensements de 1981 et de 1976 sur la langue maternelle:

- a) Le taux de non-réponse est tombé de 1.9 % en 1976 à 1.1 % en 1981. Les changements observés pour certaines langues s'expliquent en partie par un meilleur dénombrement de la population.
- b) Au recensement de 1976, 1.9 % de la population n'avait pas répondu à la question sur la langue maternelle et l'on avait codé leur langue dans la catégorie "non déclarée". Au recensement de 1981, une langue précise a été attribuée au 1.1 % des recensés qui n'ont pas répondu à cette question (voir le tableau ci-dessous).
- c) Les procédures en vue de la suppression des réponses multiples, enregistrées chez 2.4 % de la population en 1981, ont été modifiées au recensement de 1981. En 1976, un contrôle arbitraire et déterminant supprimait les réponses multiples pour ne garder qu'une réponse valable pour chaque recensé. Au recensement de 1981, on a conservé une seule réponse en utilisant des algorithmes informatiques probabilistes (voir le tableau ci-dessous pour la redistribution des combinaisons comportant le français, l'anglais et autres langues).
- d) La catégorie "Indien, n.d.a." regroupe les personnes d'ascendance autochtone et celles qui sont d'ascendance indienne asiatique. En 1976, la langue maternelle de toutes ces personnes a été codée "langue amérindienne".

# Mother Tongue Information as Reported by Assigned Mother Tongue, Canada, 1981

## Données sur la langue maternelle déclarée selon la langue maternelle attribuée, Canada, 1981

| Mother tongue as reported in 1981<br>Langue maternelle déclarée en 1981          | 1981 mother tongue assigned as<br>Langue maternelle attribuée en 1981 |                    |                  |
|--|---|--------------------|------------------|
|  | English<br>Anglais  | French<br>Français | Other<br>Autre   |
| English only - Anglais seulement   | 14,518,400  | ...                | ...              |
| French only - Français seulement   | ...   | 6,077,695          | ...              |
| Other only <sup>1,2</sup> - Autre seulement <sup>1,2</sup>                       | ...   | 2,495              | 2,897,730        |
| English and French <sup>3</sup> - Anglais et français <sup>3</sup>               | 103,595   | 104,650            | ...              |
| English and other <sup>2,4</sup> - Anglais et autre <sup>2,4</sup>               | 122,655   | 235                | 202,640          |
| French and other <sup>5</sup> - Français et autre <sup>5</sup>                   | ...   | 9,305              | 12,945           |
| English, French and other <sup>3</sup> - Anglais, français et autre <sup>3</sup> | 7,845   | 7,375              | 14,250           |
| Non-response - Non-réponse   | 165,970   | 47,340             | 48,060           |
| <b>Total</b>   | <b>14,918,460</b>   | <b>6,249,095</b>   | <b>3,175,625</b> |

Totals may not equal the sum of components due to rounding. - Les chiffres ayant été arrondis, leur somme peut ne pas correspondre aux totaux indiqués.

- 1 "Other" includes all non-official languages. - "Autre" comprend toutes les langues non officielles.
- 2 A number of write-in languages were potentially changed to French by computer edit (e.g., "Belgian" could be either "French" or "Flemish"). - Lors du traitement des données par ordinateur, le français a été attribué comme langue maternelle pour un certain nombre de réponses écrites (par ex., "belge" pouvait être "français" ou "flamand").
- 3 In 1976, a random choice was made between "English and French". - En 1976, on a fait un choix aléatoire entre le français et l'anglais.
- 4 In 1976, all records with "English and other" were assigned to "English". - En 1976, on a attribué l' "anglais" à tous les recensés qui avaient indiqué "Anglais et autre".
- 5 In 1976, all records with "French and other" were assigned to "French". - En 1976, on a attribué le "français" à tous les recensés qui avaient indiqué "Français et autre".

Users of these data should be aware that there is some impact on the comparability of the 1981 with 1976 Census data due to changes in processing procedures. However, problem-free information was provided by 96.5% of the population. Furthermore, for 98.0% of the population, the same data would have been published for 1981, whether the 1976 or the 1981 processing methodology had been used. For a more detailed explanation, users are referred to Data Quality - Total Population (Catalogue No. 99-904).

### Official Language

The comparability of the 1981 Census Official Language data with those from the 1971 Census is affected by the fact that different processing procedures were applied.

Les utilisateurs noteront que les modifications apportées aux procédures de traitement influent quelque peu sur la comparabilité des données des recensements de 1981 et de 1976. Signalons que 96.5 % de la population ont fourni des données précises. En outre, les mêmes données auraient paru pour 98.0 % de la population en 1981, peu importe que l'on eût employé la méthode de traitement de 1976 ou celle de 1981. Pour de plus amples renseignements, prière de consulter la publication Qualité des données - Population totale (n° 99-904 au catalogue).

### Langue officielle

La comparabilité des données du recensement de 1981 sur la langue officielle avec celles de 1971, est affectée par le fait que différentes procédures de traitement de données ont été appliquées.

Users should be aware that in 1971, persons who declared an official language as either their home language or their mother tongue were also considered as being able to speak that language, and the response to official language was made to agree. In 1981, this editing convention was maintained only for those who reported an official language as home language.

A major impact of the 1981 processing change, compared to 1971, would appear to be fewer "bilingual" persons and higher numbers of people reporting "neither English nor French".

For example, in Manitoba and Saskatchewan, when 1981 data are compared to 1971 data, figures show a decline in the number of "bilingual" persons. However, when simulations of 1971 processing are applied to the 1981 data, both provinces show an increase in the number of persons able to speak both English and French.

Users should refer to the 1981 Census Dictionary for a basic description of the differences between 1971 and 1981.

#### Rural Farm Population

It is quite probable that the counts shown for "rural farm population" are below the 1976 counterparts due to the more exclusive nature of the 1981 definition - see "Rural Farm Population" in the definition section.

#### REFERENCE PRODUCTS

The 1981 Census Dictionary (Catalogue No. 99-901) contains the complete range of definitions for all variables and terms used in the 1981 Census data products. Of general interest would be information contained in Summary Guide - Total Population (Catalogue No. 99-902) and Summary Guide - Sample Population (Catalogue No. 99-903) which include reproductions of the census questionnaire forms and basic indicators of data quality. Further details on the data quality may be obtained from Data Quality - Total Population (Catalogue No. 99-904) and Data Quality - Sample Population (Catalogue No. 99-905).

A wide range of other analytical and reference products are available and described, along with information on data products and available services, in Products and Services of the 1981 Census of Canada.

#### SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.

Les utilisateurs doivent savoir qu'en 1971, les personnes qui ont déclaré une langue officielle comme langue maternelle ou langue parlée à la maison étaient considérées comme étant capables de parler cette langue, et la réponse sur la langue officielle était ajustée en conséquence. En 1981, cette procédure n'a été utilisée que pour les personnes qui indiquaient une langue officielle comme langue parlée à la maison.

Le changement dans les procédures de traitement de 1981 comparées à 1971, a occasionné une diminution du nombre de personnes "bilingues" et un nombre plus élevé de réponses dans la catégorie "ni anglais, ni français".

Par exemple, au Manitoba et en Saskatchewan, lorsque les données de 1981 sont comparées avec celles de 1971, les résultats indiquent un déclin du nombre de personnes "bilingues". Toutefois, lorsque les procédures de 1971 sont appliquées aux données de 1981, ces deux provinces enregistrent une augmentation du nombre de personnes capables de parler l'anglais et le français.

Les utilisateurs doivent se reporter au Dictionnaire du recensement de 1981 pour obtenir des indications sur les changements intervenus entre 1971 et 1981.

#### Population rurale agricole

Il est fort probable que les chiffres de la "population rurale agricole" soient inférieurs à ceux de 1976 en raison de la nature plus restrictive de la définition de 1981 - voir "Population rurale agricole" dans la partie des définitions.

#### PRODUITS DE RÉFÉRENCE

Le Dictionnaire du recensement de 1981 (n° 99-901 au catalogue) donne les définitions de toutes les variables et de tous les termes utilisés dans les produits du recensement de 1981. Les renseignements que renferment le Guide sommaire - Population totale (n° 99-902 au catalogue) et le Guide sommaire - Population-échantillon (n° 99-903 au catalogue), présentent un intérêt général puisqu'ils donnent une reproduction des questionnaires du recensement et les indicateurs de base de la qualité des données. On peut obtenir plus de détails sur la qualité des données dans Qualité des données - Population totale (n° 99-904 au catalogue) et Qualité des données - Population-échantillon (n° 99-905 au catalogue).

La publication Produits et services du recensement du Canada de 1981 décrit une foule d'autres analyses et de produits de référence, et fournit des renseignements sur les produits et services disponibles.

#### SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres indisponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
